## WORK EXPERIENCE

### Xendit (PT Digital Indo Raya)

Jakarta, Indonesia

**Tech Lead** (September 2022 – Present)

**Senior Software Engineer** (February 2021 – August 2021)

- Integrated with all major banks in Indonesia, Singapore, and The Philippines to create a payment gateway platform.
- Integrated with communication channels such as WhatsApp, Viber, Twilio, and SendGrid, to ensure timely delivery of all notifications to customers via their preferred channel.
- Integrated with remittance providers such as transfer-wise to facilitate cross-border remittances.

## ODD (On Demand Deals)

Pasig, Philippines

### **Co-Founder & Chief Technology Officer** (May 2021 – September 2022)

- Co-Founded the company during the pandemic to ensure hassle-free delivery of groceries to your doorsteps in minutes without the need to go out.
- Established a technical vision with the development team. Developed all SaaS in-house which includes a management system, a mobile app, an admin panel, and support CRM.
- Grow the company from 0-1 with USD 897k TPV in just 6 months. Build a team of 52 people and 70+ locations across Metro Manila with total seed funding of USD 480k.

## Iterative (Startup Accelerator)

Singapore

### **The batch of W22** (February 2022 – April 2022)

- My Startup ODD got selected for Iterative, which is Y-Combinator for SEA companies. Got a chance to work and grow with co-founders of all different nationalities.
- After graduation, we were able to meet with 200+ VCs from all over the world and were able to raise USD 480k in pre-seed funding.

## PDAX (Philippines Digital Assets Exchange)

Manila, Philippines

### **Senior Software Engineer** (November 2019 – February 2021)

### **Software Engineer** (April 2019 – November 2019)

### **Full Stack Developer** (October 2018 – April 2019)

### **Frontend Developer** (March 2018 – October 2018)

- Lead the team for payments Integrations happening in PDAX, and was also responsible for creating the entire infra for payments (Architecture/Development) which includes integration with all Major payment providers in the Philippines.
- Created Plutus, A PDAX wallet/payment solutions provider for third-party clients.
- Wrote Solidity Smart Contracts using ERC20 and ERC721 standards for the PDAX-based coins to be traded on the PDAX exchange.
- Created Trade Exchange frontend using ReactJS and Redux with multiple graphs, used WebSockets and Restful APIs.
- Wrote backend system APIs for trade matching engine and market stats using nodeJS.

## Primus Software Corporation

Noida, India

### **Full Stack Developer** (March 2018 – July 2018)

### **Frontend Developer** (September 2017 – March 2018)

Involved in multiple projects simultaneously as a Full Stack Developer. My primary role was interacting with clients, understanding their requirements and challenges, proposing a solution, and getting the team's development done. I also worked closely with the Business Development Team to make Proof of Concepts for enterprise challenges, helping the Business Development Team grab new Projects.

**Co-Founder** (April 2015 – February 2017)

Co-Founded the company during the second year of my graduation under the college's Microsoft Innovation Center startup incubation program, intending to build a digital environment where people can perform all their tasks with reduced human efforts.

Established a technical vision with the development team. Developed various software products and completed multiple projects in the domain of Android App, Web App, and website development. Hired over 15 people, and worked on multiple projects with various teams simultaneously.

**EDUCATIONAL QUALIFICATION**

2018	B.Tech. (CSE)	71.44%	G.L. Bajaj Institute of Technology & Management affiliated with AKTU (Dr. APJ Abdul Kalam Technical University)
